

Question:

I want to know if my child is developing as he should. Where can I have a developmental check-up completed?

Answer:

Included in the many services offered by Parent Link Centres is the opportunity for parents to monitor and support the development of their children. It's exciting and rewarding to see your child learn and grow. Just like regular visits to the eye doctor or to the dentist, it's important to have a developmental check-up for your child. With the assistance of a Parent Link facilitator, parents and their children can participate in a simple screening that captures their child's stages of development. The facilitator then can provide you with ideas to continue to support your child's healthy growth and development.

Please see the related links to find a Parent Link Centre near you where you can have a developmental check-up completed on your child.
